ENT Treatment Units
and Instrument Cabinets

MEDICENTER Series

2011

Specifications, Technical Data
(as of 1st June 2011)
Dear Sir or Madam

This catalogue presents the opportunities of the MEDICENTER series opened up by the modular system. It consists of different technical, light and supplementary modules. Beside the traditional models there are numerous variants how a custom-made treatment unit or an instrument cabinet could look like.

On the next page you will find the basic technical packages that can be combined with different supplementary modules. This catalogue will show a number of examples of our ENT treatment units. Should you have specific requests, please do not hesitate to ask for an individual quotation.

Note:

- All prices given are ex works and refer to the specified configuration in the text. Images may differ.
- The prices are valid with effect from June 1, 2011. All previous price lists are no longer valid.

Technical Data:

- High quality steel case
- Power supply 220 to 240 V / 50 to 60 Hz, power connection at the rear
- Power consumption maximum 180 W
- Design of top corresponding to your MEDICENTER treatment unit
- Mobile on castors
- Varnishing complete in one RAL-colour of free choice included (except for metallic paint)
Technical Package

❖ **Suction system**
- Finely adjustable between 0 and -0.8 bar
- Capacity 70 l/min
- Automatic on/off switching via handpiece
- Automatic retracting hose, snap-in lock
- Volume of secretion glass 1 l, manual emptying

❖ **Water system**
- Electronic temperature control of rinsing water (37 °C)
- Adjustable via handpiece with detachable cannula and splash guard, flow rate 0 to 800 ml/min (at 3 bar water pressure)
- Ear rinsing funnel with automatic suction of rinsing water
- Silicon tube lip for irrigation of maxillary sinus

❖ **Compressed air system**
- Pressure adjustable between 0 and 2.5 bar via manometer
- Finely adjustable via handpiece
- Basic supply of Politzer olives

Cold Light Packages

❖ **External**
- Cold light sources within separate light module on the right side of technical module "Water-Suction-Air"
- Includes 2 halogen cold light sources 150 W, up to 4 cold light sources possible

❖ **Internal**
- Cold light sources integrated into technical module "Water-Suction-Air" (no separate light module)
- Includes 2 halogen cold light sources 150 W, up to 3 cold light sources possible

❖ **Both cold light packages include:**
- 1 heated holder for laryngoscope with automatic on/off switching of cold light
- 2 heated holders for nasal endoscopes
- 3 tubes for antiseptic solution
- 1 tube for neutralising solution
- Hook for headlight with automatic on/off switching
- Socket 3.6 V for Nystagmus lenses, steplessly adjustable
- Socket 6 V for headlight warmlight

Supply of LED cold light optional (surcharge). A combination of LED and Halogen cold light is possible. (e.g. LED for head lamp and halogen for endoscopy)

❖ **HALOGEN**
- Illumination: 3400 K
- Power input 150 W
- Lamp life: 500 hours

❖ **LED**
- Illumination: 3700 - 5000 K
- Luminosity adjustable
- Power input: maximum 10 W
- Lamp life: 50.000 hours
- Free from maintenance and wear
**Suction system**
- Finely adjustable between 0 and -0.8 bar
- Capacity 70 l/min
- Automatic on/off switching via handpiece
- Automatic retracting hose, snap-in lock
- Volume of secretion glass 1 l, manual emptying

**Water system**
- Electronic temperature control of rinsing water (37 °C)
- Adjustable via handpiece with detachable cannula (at 3 bar water pressure) and splash guard, flow rate 0 to 800 ml/min
- Ear rinsing funnel with automatic suction of rinsing water
- Silicon tube lip for irrigation of maxillary sinus

**Compressed air system**
- Pressure adjustable between 0 and 2.5 bar
- Finely adjustable via handpiece
- Automatic retracting hose
- Basic supply of Politzer olives

**Cold light package**
- 1 heated holder for laryngoscope with automatic on/off switching of cold light
- 2 heated holders for nasal endoscopes
- 3 tubes for antiseptic solution

**Order number**
1001040000001

**Dimensions**
1510x950x1165 mm

**Supplementary module at 670 mm**
- Instrument compartment on 2 levels, lower level retractable, compartmentation with stainless steel trays, interior LED lighting, acrylic cover
- Drawer for used instruments, with removable and sterilizable sight guard, fully retractable, damped move-in
- Drawer for used materials, with removable and sterilizable sight guard, fully retractable, damped move-in
- Pull-out worktop, arrestable, stainless steel plated
- Open compartment for additional devices
- 3 drawers, standard height, fully retractable, damped move-in

**Design**
- Overlapping
**Suction system**
- Finely adjustable between 0 and -0.8 bar
- Capacity 70 l/min
- Automatic on/off switching via handpiece
- Automatic retracting hose, snap-in lock
- Volume of secretion glass 1 l, manual emptying

**Water system**
- Electronic temperature control of rinsing water (37 °C)
- Adjustable via handpiece with detachable cannula (at 3 bar water pressure) and splash guard, flow rate 0 to 800 ml/min
- Ear rinsing funnel with automatic suction of rinsing water
- Silicon tube lip for irrigation of maxillary sinus

**Compressed air system**
- Pressure adjustable between 0 and 2.5 bar
- Finely adjustable via handpiece
- Automatic retracting hose
- Basic supply of Politzer olives

**Cold light package**
- 1 heated holder for laryngoscope with automatic on/off switching of cold light
- 2 heated holders for nasal endoscopes
- 3 tubes for antiseptic solution

**Supplementary module at 990 mm**
- Instrument compartment on 2 levels, lower level retractable, compartmentation with stainless steel trays, interior LED lighting, acrylic cover
- Drawer for used instruments, with removable and sterilizable sight guard, fully retractable, damped move-in
- Drawer for used materials, with removable and sterilizable sight guard, fully retractable, damped move-in
- Pull-out worktop, arrestable, stainless steel plated
- 2 Open compartment for additional devices
- 5 drawers, standard height, fully retractable, damped move-in
- Drawer, double height, fully retractable, damped move-in

Instrument cabinets MEDICENTER

They were especially designed for the workplace of MEDICENTER series. Our cabinets also consist of individual modules and are meant to complete your treatment unit to your specific requirements. Let us arrange your custom-made cabinet.

The cabinet completes your workplace for instance by additional storage space in the lighted, dustproof instrument compartment, drawers, an additional compartment for a diagnostic device, a pull-out worktop or drawers for used instruments and material.

How you arrange the elements in particular is your choice and depending on what you need and your specific room situation. There is a variety of arranging the components and you decide what is important for you.

On the following pages you will find some examples how your cabinet could look like. If you have specific wishes, please do not hesitate to ask for an individual quotation. The given prices always refer to the configuration in the text and may differ from the images.

Technical Data:

- High quality steel case
- Power supply 220 to 240 V / 50 to 60 Hz, power connection at the rear
- Power consumption maximum 180 W
- Design of top corresponding to your MEDICENTER treatment unit
- Mobile on castors
- Varnishing complete in one RAL-colour of free choice included (except for metallic paint)

Allgemeine Geschäftsbedingungen

The following terms and conditions apply to all quotations, deliveries, invoices and business contracts unless otherwise agreed in writing. The buyer’s terms and conditions apply as far as they do not contradict those of dantschke MEDIZINTECHNIK GmbH & Co. KG (further referred to as “dMT”) or in case the latter have agreed in writing. Any changes to a contract or any additional agreements have to be made in writing.

§ 1 General Conditions
(1) Quotations are subject to alteration unless otherwise agreed.
(2) Orders become legally binding after written confirmation by dMT. Oral agreements have to be confirmed in writing by dMT.
(3) An order has to specify all necessary details. dMT is not liable for mistakes and damages resulting from faulty or incomplete specifications by the client.

§ 2 Terms of Delivery
(1) Delivery periods will be agreed on for each individual order at the time when the order is placed. It starts when all technical details have been clarified. dMT is allowed to change agreed delivery dates if the reason is beyond their control.
(2) Partial delivery is permitted.
(3) dMT is not liable for falling behind with delivery or production if that is caused by force majeure, such as war, riots, strike, lockout etc. at dMT or their suppliers or subcontractors. In such a case dMT can postpone delivery depending on the duration of the hindrance or withdraw partially or completely from the contract. If the hindrance continues for at least three months the buyer has the right to withdraw from the contract.
(4) In case of a delay dMT is not responsible for, the client is not entitled to raise a claim for compensation because of customary negligence against dMT. This applies accordingly to claims for compensation because of non-fulfilment after withdrawing from a contract.
(5) If the buyer refuses the goods or fails to fulfil any other obligation, dMT is entitled to be compensated for any losses or additional expenses. In such a case the buyer takes over the risk of a loss or impairing of the goods at the time he falls into arrears.
(6) If an agreed date of delivery has to be postponed and the buyer is liable for that dMT is entitled to invoice an appropriate part of the total amount at the originally scheduled delivery time.
(7) In case that any justified doubts in the creditworthiness of the buyer arise all outstanding payments become due immediately.

§ 3 Prices, Terms of Payment, Arrears
(1) All prices are quoted ex works in Euro unless otherwise stated in dMT’s confirmation of order. Packaging, insurance, and installation will be invoiced separately.
(2) The full invoice amount falls due 30 days of the invoice date at the latest if not otherwise agreed. In case of partial delivery the invoice is split up and falls due accordingly. If payment is arrear dMT are entitled to withdraw from the contract immediately and to charge interest payable on arrears at the rates usual in Germany.
(3) If acceptance of the goods by the buyer is delayed dMT are entitled to invoice them after 10 days of the date of delivery.
(4) The buyer is not entitled to set a debt off against another unless this has been legally confirmed, undisputed or dMT have agreed to do so.
(5) In case that any justified doubts in the creditworthiness of the buyer arise all outstanding payments become due immediately.

§ 4 Reservation of proprietary rights
(1) Supplied goods remain dMT’s property until completely paid. If a payment is arrear the buyer has no right of disposal of the goods, particularly he must not remove the goods and has to give evidence to the seller within 3 days after falling arrear about where the goods are kept.
(2) The goods must not be mortgaged or transferred to a third party as security on a debt. In any case of a claim on the goods by a third party dMT has to be informed immediately.

§ 5 Warranty, Compensation
(1) The buyer has to check quantity and quality of the goods immediately after receipt. Obvious claims have to be raised within 10 days after that. If required the goods have to be returned to dMT free of charge.
(2) The goods are warranted by the manufacturer for 12 months starting on the date of delivery if not otherwise agreed in writing. Natural wear, wear and tear parts are not warranted (seals, bulbs, glass parts, filters …). Neither are damages and problems resulting from calcification due to hard water if our warning in the installation instructions and operating manual is not obeyed. There is no warranty on damages caused by improper storage, improper or excessive use, if operation instructions and manuals were not followed or if the buyer, user or other unauthorized persons have improperly tried to repair or to manipulate the goods themselves. There is no warranty either in case of wilful damages.
(3) If the goods are delivered via a local distributor they are exclusively authorized to install, maintain and repair the goods after being trained by dMT. They are responsible to give the necessary instructions to the end user on how to use the equipment.
(4) Claims for repair or replacement have to be raised immediately after receiving the goods. They have to be supported by appropriate evidence such as testing reports. If the claim is justified defective parts will be replaced or repaired free of charge at our discretion at the earliest possible date. For goods not manufactured by dMT claims for guarantee are decided upon by the real manufacturer.
(5) dMT are liable only in case of intent or culpable negligence. Any further claims by the buyer are excluded.
Allgemeine Geschäftsbedingungen

(6) Para 5 does not apply to product liability.
(7) Any limitation or exclusion of liability applies equally to the company dMT as to their internal and external staff, accomplices and representatives.

§ 6 Jurisdiction
(1) In case of any disputes that fail to be settled amicably German law is applicable.
(2) Leipzig/Germany is the place where the contract has to be fulfilled and exclusive court of jurisdiction for all deliveries and payments and for all disputes that may arise from the contract directly or indirectly. If single terms or conditions of a contract or the terms and conditions of business should become inoperative contracts remain effective.
